ACE 68 Reperfusion Catheter
ENGINEERED FOR ULTIMATE TRACKING

Revolutionary Design from Hub to Tip

Unique Coil Winding Geometry
Creates optimal tracking profile

Extended flexible distal shaft
Enhances tracking through tortuosity

16 Transitions
Enable 1:1 torque transmission

Atraumatic Tip
Improves navigation

New Proximal Polymer Segment
Minimizes pushability

Penumbra System

Science of Aspiration

The Penumbra System’s Approach
ASPIRATION
POWERED FROM PUMP TO CATHETER TIP

Pump MAX™
Generates full automated vacuum to ingest clot

Reperfusion Catheter
Delivers Pump MAX™ aspiration to occlusion

Hi-Flow Aspiration Tubing
Enables maximum aspiration

Hi-Flow Aspiration Tubing
Provides large proximal taper and increases flow rate by 25%
